Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

Claims 7-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to nonelected species and a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 24 June 2005.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Skov et al. (Des. 373,605).

Skov et al. disclose a toy block, which is a part capable of being retained in a guide for retaining a plurality of parts in such a manner as to stack the parts in a gravitational direction, and supplying the parts to a predetermined position.

The block includes a plurality of abutment portions, shown in figure 1 as A, which come into abutment with an upper-side part in the guide and support the upper-side part, and a plurality of receiving portions, shown in figure 2 as B, with which a plurality of abutment portions (A) provided on a lower-side part in the guide are brought into abutment, the abutment portions (A) and the corresponding receiving portions (B) being disposed on straight lines parallel with a part arranging direction, a center of gravity of the part being disposed inside a region surrounded by

Art Unit: 2852

the plurality of abutment portions (A), lengths between abutment locations at which the respective abutment portions (A) come into abutment with an upper-side part and receiving locations at which the receiving portions (B) corresponding to the respective abutment portions (A) come into abutment with a lower-side part being substantially the same for any of the abutment portions (A).

Regarding claim 2, the blocks fit together in an inclined attitude and in an orderly arranged state.

Regarding claim 3, the first receiving portion (B) as well as the second abutment portion (A) and the second receiving portion are respectively disposed on straight lines parallel to a part arranging direction.

Regarding claim 4, an overlap portion is shown in figure 1 as C, to overlap the lower-side part in a direction perpendicular to the part arranging direction. Overlap portion C is designed to overlap portions (A) when the blocks or similar blocks are stacked.

Regarding claims 5 and 6, a sliding portion, shown in figure 1 as D, is for sliding contact with another part, in a region different from any of the abutment locations (A) and the receiving locations (B).
